

2024 Non-Essential Drug List

Non-essential drugs are products that are very similar to existing drugs in the same category but only have slight differences in the way their chemistry is designed and how they work. Non-Essential medications typically offer no clinical improvement over other options already on the market but are sold at a higher price. Excluding these Non-Essential drugs is a cost-savings feature of your prescription benefit plan. This program is designed to prevent overpayment of certain prescription drugs. Please refer to the Non-Essential drug list below to see which drugs are excluded.

PLEASE NOTE: This list is subject to change. All the drugs listed may not be excluded by your prescription-drug benefit programs. Check your benefit materials for the specific drugs covered and the copayments for your prescription-drug benefit program. For specific questions about your coverage, please call the phone number printed on your member ID card or the CerpPassRx member service team at 844-636-7506.
