## **Healthcare Equality Index**

Recently UT has been awarded, again, certification through Healthcare Equality Index for the practices and policies related to equity and inclusion of LGBTQ patients, visitors, and staff. However, there were several measures not met, with one being an external representative of the LGBTQ community on an advisory board. Another requirement is to have UTMC representation/promotion at an event. (It would seem beneficial to have the Ryan White program promoted or the free rapid HIV test, again, this is no cost to UT.) I would also like to re-iterate the volume of work that is required to meet the measures to obtain this certification, along with the reminder that to obtain future certification, that all measures be current within the survey year. It would seem beneficial to have the Ryan White program promoted or the free rapid HIV test, again, this is no cost to UT.
