

Lerner Research Institute

Synthetic Chemist - Drug Discovery and Development BA/BS/MS Technician opening

We are currently seeking highly motivated synthetic organic chemists to join Dr. Stanley Hazen's Research group to support small molecule chemical synthesis efforts in a well-funded, large multidisciplinary research team investigating drug development efforts for cardio-thrombotic diseases. Candidates will provide chemical synthesis expertise in the development of small molecule therapeutics, and will work with a group of physicians, basic and applied science investigators, in addition to synthetic and analytical chemists. The primary job of the candidate will be synthesis of small molecule therapeutics, focusing on structure-activity efforts of leads for several different targets. Other duties may involve lead generation and optimization, and medicinal chemistry support services. The laboratory is housed in the Lerner Research Institute.

We are seeking candidates for additional support positions for synthetic chemistry efforts with individuals having at least a BA/BS or a MS in chemistry. These positions are technician-grade level with opportunity for advancement and the successful candidate will support and collaborate with multidisciplinary investigators in the research group.

The new candidate will become a member of a highly collaborative research group with outstanding opportunities for interactions with basic and translational researchers. The Lerner Research Institute, with nearly 200 independent investigators in 10 departments and an annual budget of >\$240 million, has a commitment to excellence in basic, translational and clinical research. Cleveland Clinic is ranked as the #2 hospital in America by U.S. News & World Report (2018).

Review of applications will begin immediately and continue until the position is filled. Candidates should submit a complete curriculum vitae and a brief statement of relevant experience and interests by email to:

James Anderson, PhD, 216-444-0472, andersj9@ccf.org

Cleveland Clinic is committed to providing the highest quality healthcare in a setting of education and research. The Cleveland Clinic Foundation is an Equal Opportunity/Affirmative Action employer in a smoke/drug free environment.
